

## Sending photos via WeTransfer

1. In your browser (Edge, Chrome, Firefox, Safari, Brave, etc), go to [wetransfer.com](https://wetransfer.com).

On your first visit set up a free account:

- i) Accept/manage their cookies.
- ii) Choose the Free plan and click on 'Create account'.
- iii) Enter your email address, name and a password.

Password must be eight or more characters, etc, etc.

- iv) Make a note of your password.
- v) WeTransfer will send you an email. Follow the links to confirm your account.

With your free account set up you can now send up to 2Gb of files at a time.

- vi) Return to [wetransfer.com](https://wetransfer.com).

2. Avoiding the surrounding advertising, fill in the details in the 'Upload files' box:

- i) Click on the '+' sign and navigate to your files/folder.
- ii) Select the files/folder and give the OK. Your files will be uploaded to WeTransfer.
- iii) Enter the recipient's email address, your email address, and a title or message if desired.
- iv) Click on 'Transfer'.

3. The recipient will get an email with a link to download your files.

4. When the recipient has downloaded them you will get an email confirming the transfer.
